Happy New Year! I hope you celebrated and welcomed the new year with family and friends. Now that we are well into 2019, it is time to look ahead and think about what career moves are being planned. For us, it’s a quiet break after 2018 was quite a year for all of us at UC Radiology. We have been through many developments and调整了一些big changes. We are already completing our strategic plans and initiatives for the upcoming year and beyond. We are committed to our mission of providing excellence in patient care and research. As we look ahead, we are excited about the potential for our department to continue to grow and be a leader in the field of radiology.

Ram Chadalavada, MD
Chair, Department of Radiology

Collection Challenge

The collection challenge for 2019 continues. Collection boxes are in place in all seven hospitals and clinics throughout the University of Cincinnati and Cincinnati Children’s. Collection boxes were delivered to the hospitals in December and each has been provided a goal of how many items to collect. The goal is to collect 5,000 items per hospital campus. The challenge is to exceed these goals. Again, please note that all collection boxes should be placed in public areas where they can be seen and accessible by patients, visitors, and staff. Please ensure that the boxes are not cluttered or blocked.

Collection progress will be updated monthly. Please continue to support the Collection Challenge and the improvements it has made to the patient care experience. Thank you for your support.

Holiday Party

The Radiology Department Holiday Party was held at the Convention Plaza in December. Many faculty and staff attended and enjoyed the night. The party was a huge success and a great way to celebrate the end of the year. Thank you to Dr. Bruce Mahoney, MD for hosting the event.

New Equipment Arrival

On December 1, 2018, a new 3T Magnetic Resonance Imaging (MRI) scanner arrived in the Clifton Campus. The MRI scanner will be installed in the Neurosciences Building and will be used for research and clinical purposes.

Research Excellence

Research continues to be a major focus for the department. Our faculty and staff are publishing their work in top-tier journals, presenting at national and international conferences, and receiving funding from various sources. The department has received several grants and awards in recent years, and we are proud to continue to support our researchers and their work.

Upcoming Events

Upcoming events include the Annual Scientific Meeting of the Society of Interventional Radiology (SIR), which will be held in March. The department will also be hosting a series of Grand Rounds and other educational events in the coming months.

We look forward to continuing our work and achieving even greater success in 2019.

Bruce Mahoney, MD
Chair, Department of Radiology

Please send comments and story ideas to Imaging Matters, University of Cincinnati Radiology, PO Box 670761, Cincinnati, OH 45267.
Three selected for AUR Faculty Development Program
Alina Keil MD, Artemis Petrides MD, and Lulu Zhang MD have been selected to attend the 2019 AUR Academic Faculty Development Program, to be held during the 47th Annual Meeting of the Association of University Radiologists on April 12-16 in Baltimore, Maryland. This program brings together junior radiology faculty for education and networking aimed at promoting their careers in academic radiology.

Achala Vagal, MD attended the Association of University Radiologists (AUR) meeting.

From the Chair

Happy New Year! I hope you are reflecting on last year’s highlights with family and friends. Soon after we are ready to look back and ahead and think about what you are most looking forward to. But first, a quick look back.

2018 was quite a year for all of us at UC Radiology. We have been through many developments and solved many new challenges. We are fully committed to our own mission and goals, and to support our research colleagues throughout the College of Medicine.

Of course, all of this growth and expansion has its challenges, and there is still a long way ahead. Staffing, technologies and facilities, and support systems are integral parts of our success. Of course, all of this growth and expansion has its challenges, and there is still a long way ahead. Staffing, technologies and facilities, and support systems are integral parts of our success.

We have nearly completed our extensive renovation of the College of Medicine. We have increased our imaging excellence, known for best-in-class patient care, and the highest level of innovation, a nationwide referral base, and innovative clinical and research programs. No matter the circumstances, we will not lose sight of our vision to be a naturally recognized center of imaging excellence, known for best-in-class patient care, and the highest level of innovation, a nationwide referral base, and innovative clinical and research programs.

Mahoney Named Chair of RSNA Board
Mary Mahoney, MD, has been named Chair of the Radiology Board of the American College of Radiology (ACR) for 2018-2019.

Mahoney is a breast imaging expert with a special interest in the epidemiology and screening of breast cancer. She is currently a professor of radiology at the University of Virginia School of Medicine and is director of breast imaging at the University of Virginia Health System.

Mahoney was selected for her leadership and expertise in breast imaging, as well as her commitment to advancing the field of radiology.

We Have The Best Doctors
Once again, UC Radiologists were recognized in surveys to name the area’s leading physicians.

"We Have The Best Doctors" campaign, launched in 2017, is a comprehensive program that includes marketing, PR and creative efforts to highlight the work of UC doctors, nurses and other healthcare professionals.

Breast Center Reaccredited by NQMB
The center receives the highest designation, one of only 21 nationally so recognized.

The Great Smoky Mountains Radiology Institute was named a "Center of Excellence" designation by the National Quality Breast Center (NQBC) for achieving the highest designation for breast cancer care in the United States.

The center received the designation for its quality of care and patient outcomes in the areas of mammography, breast ultrasound, and breast MRI.

NQMB has reaccredited as a "Certified Quality Breast Center" and "A ACCREDITATION COMMISSION" for the National Cancer Network's National Standards for Breast Centers (OSCGC).

The center provides comprehensive breast care services, including mammography, breast ultrasound, breast MRI, and breast cancer screening and treatment.

We have the best doctors, nurses and other healthcare professionals.

TMIST Study Led by Dr. Sobel

tin sensitivity.

Dr. Lawrence Sobel, MD, has been named the lead investigator of the TMIST (Transmission Mammography Imaging Screening Trial) study.

The study, which was funded by the National Cancer Institute, is an international, multicenter trial that aims to evaluate the performance of mammography and digital mammography in detecting breast cancer.

Dr. Sobel, who is the director of the Division of Breast Imaging at UC Health, has been involved in the study from the beginning.

He is an expert in breast imaging and has published numerous articles on the topic.

Once again, UC Radiologists were recognized in surveys to name the area’s leading physicians.

UC Health Welcomes New Mobile Mammography Van
The van is equipped with all the latest technology and will be available from 8 a.m. to 4 p.m. Monday through Friday.

The van will be parked at various locations throughout the city, including the UC Health Park at 3333 Vine St.

UC Health welcomes the addition of the mobile mammography van, which will help increase access to mammography screening for women in the community.

UC Radiology alumni gathered at RSNA 2018
The event included a warmup exercise, followed by a lecture on the latest developments in radiology.

The event was attended by numerous UC Radiology alumni, including Dr. Jennifer Scheler, MD, who is currently the director of breast imaging at UC Health.

Breast Cancer Awareness Month
Breast Cancer Awareness Month is observed in October each year, with the goal of raising awareness about breast cancer and its prevention.

This year, the theme of breast cancer awareness month is "Get Your Sailors in Stitches: Tips for Detecting Breast Cancer."
UC Health Welcomes New Mobile Mammography Van

Mary McPherson, MD, Benjamin Fisher Radiology Chair and Professor of Radiology, was named Chair of the Radiological Society of North America (RSNA) Board of Directors Nov. 11, at the society’s annual meeting in Chicago.

Over the years, Dr. McPherson has served RSNA in numerous capacities. For example, she was the first woman to preside over the annual RSNA House of Delegates meeting in 2013 and remains a member of its executive committee.

She joined the RSNA board in 2014. Dr. McPherson has also held committee or leadership positions in a number of other organizations, including the Society of Breast Imaging (SBI) and the American Roentgen Ray Society (ARRS), which honored her with its Distinguished Service Award this year.

Dr. McPherson heads the study locally, says Lawrence Sobel, MD, who heads the study locally, says, “It is the only program in the region that recruits patients, with 119 centers participating in 27 states.”

The study’s key features are: the enrollment and follow-up of 165,000 women aged 45-74 for up to 10 years; participation of certain risk factors; and in what ways risk or how it can be used with current diagnostic modalities, such as mammography, ultrasound, and magnetic resonance imaging.

The TMIST is a National Cancer Institute-funded study with high-risk or triple-negative breast cancer (TNBC) patients. It is the only one of 21 centers nationally to gain this highest distinction for excellence in breast cancer research.

The van replaces an older model. It is scheduled to be on the road full time and will be available for both 2D and 3D imaging, and mobile mammography van on October 25, 2018. It is equipped with digital mammography equipment and has been designed with patient comfort in mind.

UC Radiology alumni gathered at RSNA 2018

The University of Cincinnati Cancer Institute’s (UCCI) Department of Radiology is proud to announce two UC Radiology alumni who were recently elected to the American Roentgen Ray Society (ARRS) for 2018. Both women have successfully completed residency programs at UC.

Mary McPherson, MD, Benjamin Fisher Radiology Chair and Professor of Radiology, was named Chair of the Radiological Society of North America (RSNA) Board of Directors Nov. 11, at the society’s annual meeting in Chicago.

Happy New Year! I hope you celebrated the New Year with family and friends. Now that we are a few days into the New Year, I would like to look ahead and think about where we are now planning to focus. First, a quick look back... 2018 was quite a year for all of us at UC Radiology. We have grown through many developments and achieved a lot.

We have nearly completed our extensive renovations. We have added new fellowship positions, and new services. Our new Interventional Radiology section is open for business. We have expanded our specialty groups, added new faculty, and support to our research colleagues throughout the College of Medicine.

Of course, all of this growth and expansion has been a challenge, and there is still work to do. Staffing, technologies and facilities, and the growth are all exciting and challenging. Staffing, technologies and facilities, and the growth are all exciting and challenging. Staffing, technologies and facilities, and the growth are all exciting and challenging.

One of the most exciting things is the growth and expansion in clinical services. We have added new service lines, and new equipment. We have added new faculty, and support to our research colleagues throughout the College of Medicine.

As we move forward, I hope you will continue to support our mission to provide the highest quality patient care, and to be a leader in patient imaging and research.

Thank you for all your hard work and dedication. I look forward to a year of continued growth and expansion, and I hope you will continue to support us in our mission.
