

Attendance Policy for Students on Clinical Rotations

Each student planning to take time off for residency interviewing must notify the course director at the start of the rotation. Students will be allowed two (2) days off for non-Acting Internship (non-AI) rotations. If additional time off is needed, the student needs to make arrangements with the course director to make up the additional days missed. Only two (2) days off (maximum) are permitted during AI rotations. The days off can ONLY be granted for interviewing purposes. Finally, any days off taken by a student within the scope of this policy are granted solely at the discretion of the course director.
