The Timothy Freeman, MD, Center for Intellectual and Developmental Disabilities provides specialized, patient-centered, coordinated healthcare to patients age 18+ with intellectual and/or developmental disabilities. This includes, but is not limited to, the following:

- Angelman syndrome.
- Autism.
- Cerebral palsy.
- Developmental disabilities.
- Down syndrome.
- Fragile X.
- Rett syndrome.
- Spina bifida.
- Williams syndrome.
- Other rare genetic conditions.

We are here for you. Our No. 1 goal is to provide you with the best possible care. Our services include:

- Primary care.
- Behavioral health and psychiatry.
- Physical medicine and rehabilitation.
- Nurse care coordination.
- Dietary support.
- Social work.
- Healthcare transition planning.
- In-person and virtual healthcare visits.
- Condition-specific health consultations.
- Specialty care referrals.

“The reality is my adult children face enormous barriers to good health. They have significant, complex needs that are not easily addressed by decentralized care, unfamiliar healthcare professionals and having to travel to multiple care sites. UC Health has a unique opportunity to change the status quo and, ultimately, improve their quality of life.”

— Diana, parent of triplets with autism
