If you need to submit an Investigator Initiated study and are unsure which forms should come to us with your intake form, please refer to Issue 5 of our Newsletter or contact us.

What’s the process to get IM Regulatory services involved for your new study?

1. Review the protocol and determine:
   - What facilities will be utilized and who will be part of your study team.
   - Have conversations with the study team and ancillary areas to make sure they are aware and agree to be a part.
   - Will a local lab be utilized?
   - Are there any supplemental reviews required? (IBC/RSC)
   - Will participants be compensated for their participation? If so when and how much?

2. Once you have all this information, complete the regulatory intake form. Reg Intake Form

3. Attach intake form and all study documents (or reg packet if Industry sponsored) in one email and submit to IMRegulatory@uc.edu

4. We will review your request and a regulatory CRP will be assigned.

5. We will work with you each step of the way on getting IRB approval and site initiation from the sponsor (if applicable).

If you have any questions, please do not hesitate to reach out to: IMRegulatory@uc.edu
